5. HIGH TEMPERATURES

Seville in the summer months can reach high temperatures, particularly if there is a heat wave. Here are some tips based on common sense that you can apply in case you are not used to this kind of temperatures:

- It is important when you go out to wear a hat and to walk in shadow as possible.
- If you are very sensitive to solar radiation, better to wear solar cream on your face, arms and legs.
- The best hours to go for a walk are before 11 am and after 8 or 9 pm. The sunset is around 10 pm.
- Drink water, slowly (all the time) even if you don't feel thirsty.
- Draw the blinds in the buildings/rooms where you are.
- Use a fan (the word in Spanish is "abanico").
- Use vaporisers with cool water (we'll have some at the Training School that you can use).
- Take cool showers and dress in light and loose clothing made from natural fabrics
- Most buildings are air-conditioned buildings but remember that being indoor with temperatures below 21 degrees and then going outside may not be too sharp of a contrast.
